

Rope Access Services

Elite Safety Services Inc. is a Canadian company that provides customized safety training and standby services to Industrial, Construction, Manufacturing, and Energy sectors. Owned and operated by former Professional Firefighter Paramedics, our company provides a level of professionalism and expertise only gained through real world experience.

Elite Safety Services Inc. specializes in training, turnaround and rescue activities. We have provided Paramedics, Confined Space, Rope Rescue Technicians and National Construction Safety Officers to some of Canada's most prominent companies. On client sites, our usual roles include site safety, drug and alcohol testing, fit testing, training, confined space rescue, paramedic level care and air trailer provision.

We understand the challenges in maintaining compliance that employers across Canada face. What Elite Safety Services Inc. is proposing is a level of care that exceeds expectations, and is available exclusively to your company. There are no "out of service" issues and the skill sets offer a level of service virtually unheard of within Industry. This paper will outline the benefits of our company and the service that we are capable of.

Benefits of Working with Our Company:

One of the most significant benefits of choosing Elite Safety is the fact that we have extensive real world experience. We are established and able to function independently or as a member of a team to meet your safety requirements through utilization of our staff. Additional benefits of our company include:

1. We belong to ISNetworld and Comply works vendor management systems which ensure our continuous compliance with our clients and their mandates.
2. All Elite Safety Services Inc. staff are covered through the applicable Provincial Workers Compensation Board.
3. Our “Facility Maintenance” teams are able to provide Confined Space Management or Rope Access to clients working in high risk work locations.
4. All medical treatment, Drug and Alcohol testing and Respiratory Protection Program is overseen by our Medical Director.
5. Our company has Commercial General Liability and Errors and Omissions insurance through HUB International in Winnipeg, Manitoba.
6. We are a COR certified company through the Construction Safety Association of Manitoba.
6. We are one of the few service providers capable of Primary Care Paramedic trained staff with Advanced Life Support capabilities for industrial locations if required by the client.

Rope Access:

Working at heights can often be an overwhelming task. Elite Safety Services Inc. can help “**Facility Maintenance**” by deploying our Rope Access teams to work at your locations.

Rope Access is a form of work positioning, initially developed from techniques used in climbing and caving, which applies practical rope work to allow workers to access difficult-to-reach locations. This is done without the use of scaffolding, cradles or aerial work platforms. Our Rope Access Technicians descend, ascend, and traverse ropes for access and work while suspended by their harness.

When utilizing our “**Facility Maintenance**” services, our Rope Access Services may include:

- Welding
- Non Destructive Testing & Inspections
- Concrete Inspection/Restoration
- Electrical
- Painting
- Power Assisted Washing
- Blasting
- Refractory
- Pipefitting
- Insulation
- Inspection
- Facility Routine Maintenance
- Onsite At-Height Rescue

1. *Rope access is versatile.*

Technicians can apply the concepts in a wide variety of environments. Unlike traditional access methods, custom rope-access solutions can be designed to fit various applications quickly and inexpensively.

2. *Rope access is safe.*

Independently-certified rope access technicians uphold an enviable safety record with no fatalities and few lost time incidents while working on rope.

3. *Rope access is efficient.*

Systems are installed and dismantled quickly and often require fewer personnel than traditional access methods. Rapid deployment limits disruption to facility operations by minimizing downtime.

4. *Rope access is economical.*

Fewer personnel, faster completion, less equipment, and minimal downtime mean lower costs.

Our company is not trying to grow into the provision of this service. Whether we are working alongside your staff or independently, our overall management of work at height will ensure the safety, health and protection of all involved with the task at hand.

In Summary:

For additional information on “**Facility Maintenance**” and Rope Access services, please feel free to contact us. We would appreciate an opportunity to sit down with you to discuss our staff, our current clients and your expectations.

Sincerely,
