

Safety Program Development & “Continuous Improvement Program”

Elite Safety Services Inc. is a Canadian company that provides customized safety training and standby services to Industrial, Construction, Manufacturing, and Energy sectors. Owned and operated by former Professional Firefighter Paramedics, our company provides a level of professionalism and expertise only gained through real world experience.

Elite Safety Services specializes in training, turnaround and rescue activities. We have provided Paramedics, Confined Space, Rope Rescue Technicians and National Construction Safety Officers to some of Canada's most prominent companies. On client sites, our usual roles include site safety, drug and alcohol testing, fit testing, training, confined space rescue, paramedic level care and air trailer provision.

We understand the challenges in maintaining compliance that employers across Canada face. What Elite Safety Services Inc. is proposing is a level of care that exceeds expectations, and is available exclusively to your company. There are no "out of service" issues and the skill sets offer a level of service virtually unheard of within Industry. This paper will outline the benefits of our company and the service that we are capable of.

Benefits of Working with Our Company:

One of the most significant benefits of choosing Elite Safety is the fact that we have extensive real world experience. We are established and able to function independently or as a member of a team to meet your safety requirements through utilization of our staff. Additional benefits of our company include:

1. All Elite Safety Services Inc. staff are covered through the applicable Provincial Worker's Compensation Boards.

2. We belong to ISNetworld and Comply works vendor management systems which ensure our continuous compliance with our clients and their mandates.
3. Our “Facility Maintenance” teams are able to provide Confined Space Management or Rope Access to clients working in high risk work locations.
4. All medical treatment, Drug and Alcohol testing and Respiratory Protection Program is overseen by our Medical Director.
5. Our company has Commercial General Liability and Errors and Omissions insurance through HUB International.
6. We are a COR certified company through the Construction Safety Association of Manitoba.
7. We are one of the few service providers capable of Primary Care Paramedic trained staff with Advanced Life Support capabilities for industrial locations if required by the client

Safety Program Development:

Elite Safety Services has long been synonymous with health and safety programs. Our continuous involvement in training, program review, health and safety legislation and course instruction reaffirms our commitment to our clients. Our National Construction Safety Officers not only have extensive backgrounds in construction, plant turnarounds and shutdowns, they also have a thorough understanding of the Manitoba Legislation and “Certificate of Recognition” requirements.

In developing a Safety Program, Elite Safety Services Inc. will visit your facilities, evaluate your current policies and procedures and conduct interviews and site visits to understand your operations.

A Safety Program is not a manual. It is a vision and a commitment with guidance that fosters safe work. Our NCSO's will undertake all audits and processes to develop the Safety Program for implementation, and can maintain this program with use of our "Continuous Improvement Program."

Upon completion and successful implementation of an Elite Safety Services Inc. "Safety Program", the owner is able to apply for COR or SECOR recognition. Development of a Safety Program is not as complicated as one might think. We can help.

Continuous Improvement Program:

After the successful development of your companies "Safety Program", maintenance of the program and any COR or SECOR certification is simplified with enrolment in the "Continuous Improvement Program." In doing so, you will have round the clock access to an NCSO that will assist with the following:

1. Provide assistance with ensuring the health and safety of employees
2. Involvement in safety meetings and toolbox talks
3. Conduct regular site inspections
4. Provide recommendations for improvement

5. Communicate with the health and safety committee
6. Recognize and mitigate hazards
7. Monitor compliance with safe work practices and procedures
8. Provide clarity and understanding to legislative requirements
9. Ensure documentation is complete and accurate
10. Maintenance of safety statistics and identify trends
11. Incident investigations
12. Drug and alcohol testing

Instilling characteristics and promoting attitudes are key to the continuous improvement of your company's safety culture. Join Elite Safety Services Inc. "Continuous Improvement Program" today to demonstrate your commitment to providing a safe and healthy workplace for all of your employees.

Summation

Our clients are very important to us. It was at their request that our company ventured into specialized services. We feel that we have identified your requirements and will provide a clear and concise fee schedule for your use. Please review the

information provided, and if you have any questions or would like a formal presentation on our company, services or staff, please feel free to contact us.

Sincerely,

ORIGINALLY SIGNED

Mathew Bonville, NCSO
Risk Management Supervisor
