ELITE
SAFETY SERVICES INC.

ABOUT OUR COMPANY

Elite Safety Services Inc. is a Canadian-owned health and safety company providing integrated emergency response, medical, training, oilfield, and risk management services across industrial, construction, manufacturing, energy, and municipal sectors. With operations throughout Manitoba and Saskatchewan and the ability to mobilize nationally, Elite delivers professional safety services tailored to complex and high-risk work environments.

Founded and operated by former professional Firefighter Paramedics, Elite Safety Services brings real-world emergency response experience into every aspect of its operations. This operational background allows Elite to go beyond compliance-focused safety support and deliver practical, field-tested solutions that protect workers, reduce risk, and support uninterrupted operations.

Elite Safety Services specializes in technical rescue, on-site medical services, occupational health testing, safety training, oilfield services, and comprehensive risk management. Our teams work closely with clients to identify hazards, assess risk, and implement controls that reduce the likelihood and severity of incidents before work begins.

Our teams regularly work alongside client operations, contractors, and regulators, providing support that aligns with site-specific requirements and project schedules. Whether supporting day-to-day operations, shutdowns, or major turnarounds, Elite provides scalable solutions designed to meet the demands of each project.

COMMITMENT

We are committed to supporting safe work execution, and reducing risk in high-hazard environments. We partner with our clients to deliver practical, compliant solutions that prioritize worker safety without disrupting operations.

QUALITY OF SERVICE

Our service is built on experienced personnel, rigorous standards, and a hands-on approach to every project we support. As a COR-certified organization with proven experience across all industries we serve, we deliver consistent, reliable service

OPERATIONAL FOOTPRINT

Manitoba

- Winnipeg

Saskatchewan

- Weyburn

RESCUE SERVICES

Elite Safety Services routinely provides confined space and high angle rescue services in industrial vessels and structures, including tanks, silos, boilers, reactors, pressure vessels, and process piping systems. Our technicians also work in commercial and industrial buildings, towers, and elevated structures where confined space and working-at-height hazards are present. Elite rescue technicians hold minimum Advanced First Aid qualifications, allowing immediate patient care once access is achieved.

Confined Space Rescue

Confined space rescue involves emergency response in restricted or enclosed spaces with limited entry or exit and potential atmospheric or physical hazards. These spaces are not designed for continuous occupancy and often prevent self-rescue.

Typical confined spaces include tanks, vessels, silos, pits, vaults, manholes, and enclosed process equipment.

High-Angle Rescue

High-angle rescue involves emergency response in elevated or vertical environments where rope systems and technical rescue methods are required to access and remove a patient. These incidents occur where fall hazards or steep terrain prevent conventional access.

Standby Services

Elite provides standby rescue and safety watch services including confined space attendants, safety watch, fire watch, and bottle watch, providing continuous monitoring of work conditions, equipment, and personnel. Standby teams help maintain permit compliance, identify hazards early, and initiate emergency response procedures without delay.

Our technicians are experienced with

- Permit systems
- Lockout/tagout Procedures
- Turnarounds/Shutdown Coverage
- Working at Heights
- Site Specific Rescue Plans & Permits

This allows Elite Safety Services Inc to function as a trusted extension of our client's emergency response and safety framework. By deploying rescue-ready, multi-skilled teams, Elite delivers reliable, compliant rescue services that support safe work execution — not just emergency response.

HEALTH SERVICES

On Site Medical Services

Elite Safety Services delivers comprehensive on-site medical health solutions to worksites, projects, and special events. Our services are designed to support workforce readiness, regulatory compliance, and rapid medical response in both routine operations and high-risk environments.

Elite has provided the following professionals to client sites and projects:

- Advanced First Aid Personnel
- Emergency Medical Responders (EMR)
- Primary Care Paramedics (PCP)
- Nurses

All medical services are supported by fully stocked mobile treatment units and are delivered in accordance with provincial regulations, industry standards, and client requirements.

Drug & Alcohol Testing

Point-of-collection and lab-based testing services are available, with customizable testing panels to meet site and regulatory requirements. Elite is also approved to provide third-party collections for various agencies and programs, ensuring accurate, compliant, and defensible results.

We provide testing for a variety of purposes including but not limited to:

- Post Incident
- Reasonable Suspicion
- Pre Employment
- Pre Access

Respiratory Fit Testing

Both qualitative and quantitative respirator fit testing services are available to support respiratory protection programs. Testing is conducted by trained technicians using approved protocols to ensure proper respirator fit and worker safety.

Fitness-for-Work Assessments

Functional and task-specific fitness assessments help determine an individual's ability to safely perform job duties, reducing the risk of injury and supporting informed placement and return-to-work decisions.

Spirometry Testing

Pulmonary function testing is provided as part of respiratory protection and health surveillance programs, helping employers monitor lung health and comply with occupational health requirements.+

TRAINING SERVICES

Elite Safety Services provides comprehensive health, safety, and emergency services training programs based on current provincial legislation, federal requirements, and NFPA standards. Training is delivered by experienced instructors with real-world operational backgrounds and emphasizes hands-on, practical learning.

Safety & Technical Training Courses

Elite delivers a wide range of safety and first aid courses, including:

- Confined Space Entry & Rescue
- Working at Heights
- Elevated Work Platforms
- H2S Alive®
- Emergency & Standard First Aid
- Basic Life Support
- WHMIS, Ladder Safety, and Equipment-Specific Training

Training programs can be customized to reflect client policies, procedures, hazards, and equipment, ensuring relevance to real job conditions.

Safe Work Manitoba Certified

Elite's Confined Space Entry and Working at Heights training programs are Safe Work Manitoba certified, ensuring compliance with provincial requirements and recognized training standards

On-Site Training Delivery

Training can be delivered directly at client locations, allowing instruction to occur in the actual work environment using site-specific hazards, equipment, and procedures. Our instructors travel to customer sites as required, providing flexible scheduling and minimizing operational downtime.

PROFESSIONAL PROGRAMS

Elite is proud to offer Primary Care Paramedic (PCP) and Emergency Medical Responder (EMR) programs that are College of Paramedics of Manitoba approved.

Elite Safety Services operates as a recognized Private Vocational Institution, delivering these professional education programs from our Brandon, Manitoba office.

Graduates from both programs are eligible to write the national entry-to-practice examination.

Emergency Medical Responder (EMR) Program (328 Hours)

Elite's Emergency Medical Responder (EMR) program provides foundational emergency medical training for industrial, remote, and pre-hospital environments. The program covers patient assessment, basic life support, trauma and medical emergencies, and scene safety, with a strong emphasis on hands-on skills and scenario-based learning delivered by experienced emergency response professionals.

Primary Care Paramedic (PCP) Program (1504.5 Hours)

Elite's Primary Care Paramedic (PCP) program delivers comprehensive paramedic education focused on front-line patient care in pre-hospital and industrial medical settings. Training includes advanced patient assessment, trauma and medical management, pharmacology, and clinical decision-making, supported by extensive hands-on labs and scenario-based instruction.

Elite is proud to maintain a 100% first-time pass rate for graduates of our EMR and PCP programs writing the COPR entry-to-practice examinations

RISK MANAGEMENT

Elite Safety Services is a COR-certified company providing practical risk management support to help organizations identify hazards, maintain regulatory compliance, and strengthen safety culture across construction, industrial, oilfield, and turnaround environments

National Construction Safety Officers (NCSO)

Elite supplies experienced National Construction Safety Officers (NCSO) and safety advisors to provide consistent on-site safety oversight and support safe work execution. Our NCSOs integrate seamlessly with client teams and contractors.

Services include:

- Full-time, part-time, and project-based site coverage
- Contractor and employee orientations
- Field Level Hazard Assessments (FLHA) and toolbox talks
- Job Safety Analysis (JSA) development and review
- Work permitting, audits, and incident response support

Safety Program & COR Support

Elite assists clients with the development, review, and maintenance of health and safety programs aligned with provincial legislation and industry standards, including:

- Health & Safety Programs and Safe Work Procedures
- Confined Space Assessments
- COR certification assistance and maintenance

Inspections & Incident Management

Ongoing safety oversight is provided through inspections, audits, hazard assessments, and incident and near-miss investigations to support continuous improvement and risk reduction.

Client Account & Vendor Management

Elite provides active management of client safety accounts to maintain contractor compliance and reduce administrative burden. Supported platforms include ISNetworld, ComplyWorks, Avetta, 8am Solutions, and client-specific systems.

OILFIELD SERVICES

WEYBURN, SK

Elite Safety Services provides comprehensive oilfield safety, medical, and emergency response support for drilling, completion, maintenance, and turnaround operations. Our oilfield teams are experienced in high-risk environments and are equipped to support continuous operations while maintaining compliance with regulatory and client-specific requirements.

On-Site Medical Services

Elite supplies qualified on-site oilfield medics to support frac operations, medical stations, and drilling rigs, providing medical care, patient stabilization, and coordination with local emergency services. Our medics operate from fully stocked mobile units and are trained to respond to medical, trauma, and environmental emergencies common to oil and gas operations.

Supplied Air & Breathing Air Services

Elite supports supplied air and respiratory protection work through the provision of certified breathing air systems and trained personnel. Services include supplied air carts and trailers, mobile breathing air compressors, SCBA units, bottle watch personnel, and continuous air supply monitoring. All breathing air equipment is maintained and tested in accordance with CSA standards to ensure worker safety during IDLH and confined space work.

Gas Detection & Hazardous Atmosphere Monitoring

Elite provides continuous and task-specific atmospheric monitoring to manage hazardous exposures commonly encountered in oilfield environments. Monitoring services include

- H₂S detection
- Benzene monitoring
- Oxygen deficiency or enrichment
- Lower Explosive Limit (LEL) monitoring

Our technicians utilize calibrated gas detection equipment and provide real-time data to support safe work execution and regulatory compliance.

Additional Support Services

Elite delivers firefighting, technical rescue standby (including confined space and high-angle rescue), and emergency response services to support critical oilfield operations. Additional support includes

- Emergency Shower Units
- Air Trailers
- Vapour Suppression
- GasClip Sales
- Equipment Maintenance & Inspections

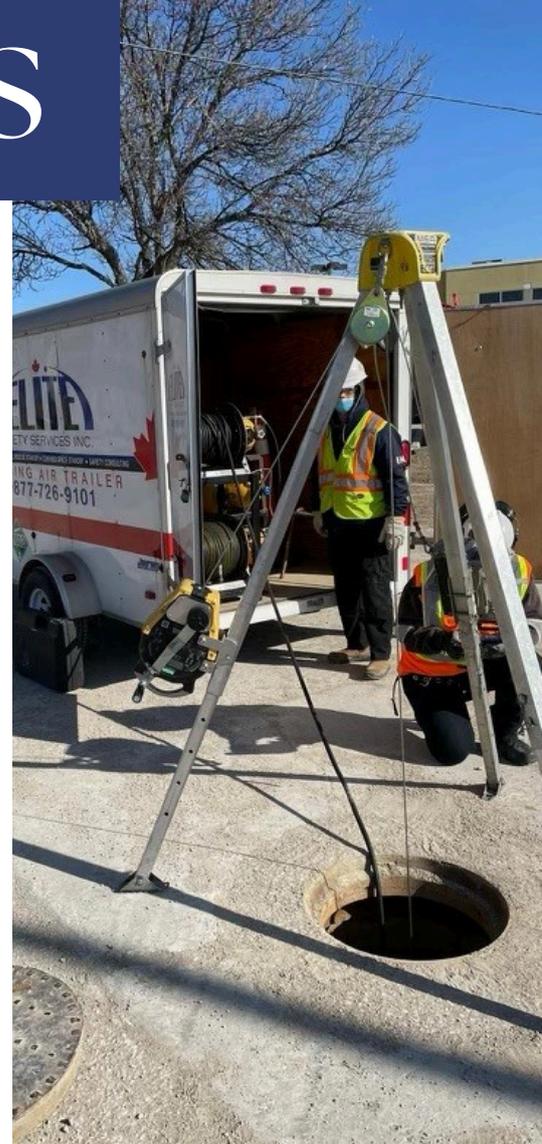

RETAIL SALES

In addition to its services and training programs, Elite supplies a comprehensive range of safety and emergency response equipment to support safe and compliant operations. This includes fall protection systems, respiratory protection, gas detection equipment, SCBA units, and related safety accessories. Elite also provides FR clothing and PPE suitable for a variety of industrial and oilfield environments. Equipment rentals are available, along with inspection, testing, certification, and ongoing maintenance services to ensure all equipment remains compliant, reliable, and ready for use.
